

Mauricio Boyé

Full-Stack developer Junior
Rio Negro, Argentina

About me

Full stack developer, learning enthusiast and really good at solving problems.
Helping people's lives through software solutions

Experience

Dental appointment booking system / Developer

Certified Tech Developer (Backend 1 project), Buenos Aires-Argentina

March, 2022 - April, 2022

- Implement a system to manage the reservation of appointments for a dental clinic with Java.
- Api rest build with: Java, Spring Boot, Hibernate, JUnit, MySQL.
- Front-end build with: React, Bootstrap.

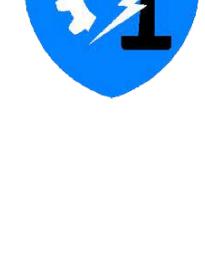

"Centenario" clock redesign / Team Leader

Municipality of Allen (Internship), Allen-Argentina

April, 2020 - December, 2020

- Research and document the most useful functions of a community clock in the city of Allen and increase their habitants comfort by the redesigning the old clock and assigning new visual modifications as a solution to their needs.
- Develop a prototype with the Arduino platform together with a team of 5 people.
- Give a talk for more than 30 people explaining the project process.

School clock design with automatic bell / Team Leader

Technical High School N°8, Allen-Argentina

April, 2019 - December, 2019

- Research and document the main problems that occur daily in the schools that have manual bells and design a new model to facilitate their use by incorporating visual modifications and an automatic bell system according to their needs.
- Develop a prototype with the Arduino platform, a PCB and 3D printer together with a team of 3 people.
- Implement the new design and evaluate its functionality through feedback from previous users.
- Give a talk for more than 20 people explaining the project process.

Education

Backend Specialist (Certified Tech Developer)

Mercado Libre and Globant together with Digital House (Buenos Aires, Argentina)

July, 2022 - July, 2023

- Cryptography, security, data management y design patterns.

Certified Tech Developer
